Subject: Re: Arkwood

Per our telephone conference at 4pm, I called Bud Grisham at (870) 741-4805 to discuss his and his son's interest in observing the soil sampling. Bud did not answer his phone; however, I left a message stating that he is supposed to call me - not the agencies - for issues regarding the Arkwood site. I left him my cell number (which he already has) for reference. I said that if he wants to observe the soil sampling, we are on the last sampling unit and it's near the entrance gate. He can observe the sampling from outside the fence or inside at a safe distance from the sampling area but he needs to be here in the next 20-30 min. I also said that the dye tracing will be conducted in the next couple of weeks. That was the end of my message. I will let you know as soon as a date is set for the dye tracing. It will likely be the second week in November. Jean

Hi Jean, Mark,

Just a quick note to let you know that I'm back in the office.

I've been informed that Curt Grisham had requested for his dad and/or himself to observe some of the sampling.

I would like to formulate a process to let that happen in a controlled environment without adverse impact to the ongoing field work.

Are you available this afternoon at 4 pm Central or afterwards to discuss?

Thanks,
